

Koussay Akchi

Full Stack Engineer

Email: akchikoussay@gmail.com | Phone: +216 40 862 777 | Location: Tunis, Tunisia | Website: koussay.tn | LinkedIn: linkedin.com/in/koussay-akchi-782765274 | GitHub: github.com/Koussay-Akchi

Profile

I am a Full Stack Software Engineer with a strong focus on building robust web applications, cloud-native systems, and automation solutions. I enjoy working across the stack, from backend architecture to user-facing interfaces, and I continuously improve my skills through projects and hands-on engineering work.

Experience

Cloud Engineering Intern

Jun 2026 - Aug 2026

Next Step | Tunisia

Designed and deployed a unified API and AI Gateway platform on Apache APISIX, centralizing API management and AI service orchestration in a Kubernetes environment. Implemented multi-tenant isolation, JWT and key-based authentication, Redis-backed rate limiting, and canary traffic splitting.

- Built an AI orchestration layer supporting OpenAI, Claude, Gemini, and DeepSeek with token metering and PII masking.
- Delivered a React and Node.js self-service portal with RBAC, monitoring dashboards, and observability tooling.
- Validated resilience with chaos testing and deployment automation across cloud-native services.

Tools: Apache APISIX, Kubernetes, Helm, Lua, Kafka, Prometheus, Grafana, Jaeger, Redis, Node.js, React, PostgreSQL

Full Stack Software Engineer

Jul 2025 - Present

OpkodeLabs | Tunisia

Developed WattLink, a multi-tenant EV charging management platform built on the OCPP 1.6 protocol. The platform enables operators to monitor charge sessions, apply dynamic pricing, and manage telemetry across distributed networks.

- Built real-time charge station monitoring with Laravel, PostgreSQL, Redis Pub/Sub, Socket.IO, and Grafana.
- Implemented admin workflows for remote control, session tracking, and operational visibility.

Tools: Laravel, Python, Redis, Docker, Socket.IO, Grafana, PostgreSQL

Full Stack Software Engineer

Feb 2025 - Dec 2025

HexaFlow | Tunisia

Contributed to dynamic web applications using React, Next.js, Node.js, and Java, while optimizing system architecture with Docker and cloud deployment patterns.

- Delivered features in agile teams with a focus on quality, maintainability, and delivery speed.
- Helped modernize deployment and infrastructure workflows using Docker and Azure-based tooling.

Tools: React, Next.js, Node.js, Java, Docker, Terraform, Azure

Full Stack Software Engineer

Jun 2024 - Jan 2025

Wecraft | Tunisia

Developed and maintained a CRM platform for pharmaceutical laboratories, covering frontend interfaces, backend services, and test coverage across both layers.

- Implemented user-facing workflows and enterprise business logic for laboratory operations.
- Designed and validated backend and frontend test coverage to support stable releases.

Tools: React, Quarkus, Docker, JWT, PostgreSQL, MongoDB

End of Studies Internship

Jan 2024 - Jun 2024

Wecraft | Tunisia

Gained practical experience in developing and maintaining web applications, covering both frontend and backend tasks in a team environment.

Tools: React, Quarkus, Docker, JWT, PostgreSQL, MongoDB

Summer Internship

Jun 2023 - Jul 2023

Alliance Technologie | Tunisia

Developed a microservice and API for managing electronic purchase vouchers for SNDP customers.

Tools: C#, ASP.NET, Java, PostgreSQL

Education

Engineering Degree in Software Engineering

2024 - Present

ESPRIT

Bachelor's Degree in Computer Science (GLSI)

2021 - 2024

ISTIC Borj Cedria

Skills

Node.js • Java • Python • TypeScript • React • Next.js • Angular • Docker • Kubernetes • Terraform • Linux • Azure • MongoDB • PostgreSQL • C • SQL

Languages

English: Fluent • French: Fluent • Arabic: Native

Certifications

-
- CCNA: Switching, Routing, and Wireless Essentials — Cisco
 - <https://www.credly.com/badges/058d5f66-db69-484d-88be-525bb33c98c9>
